# SW Pricing

- Monthly License Charge Metrics
  - ▶ Machine Capacity Pricing: PSLC (Parallel Sysplex License Charge)
    - Usage Pricing: ULC (Usage License Charge)
  - ▶ SubCapacity Pricing: WLC (Workload License Charge)
    - Usage Pricing: SALC (Select Application License Charge)
  - ▶ Specialty Pricing:
    - NALC (New Application License Charge)
    - zAAP (zSeries Application Assist Processor)
- IPLA (aka: One Time Charge) Software
  - ▶ Value Unit Overview
  - ▶ z/OS, Execution and Reference based Pricing

# z9xx Monthly License Charge (MLC) Metrics

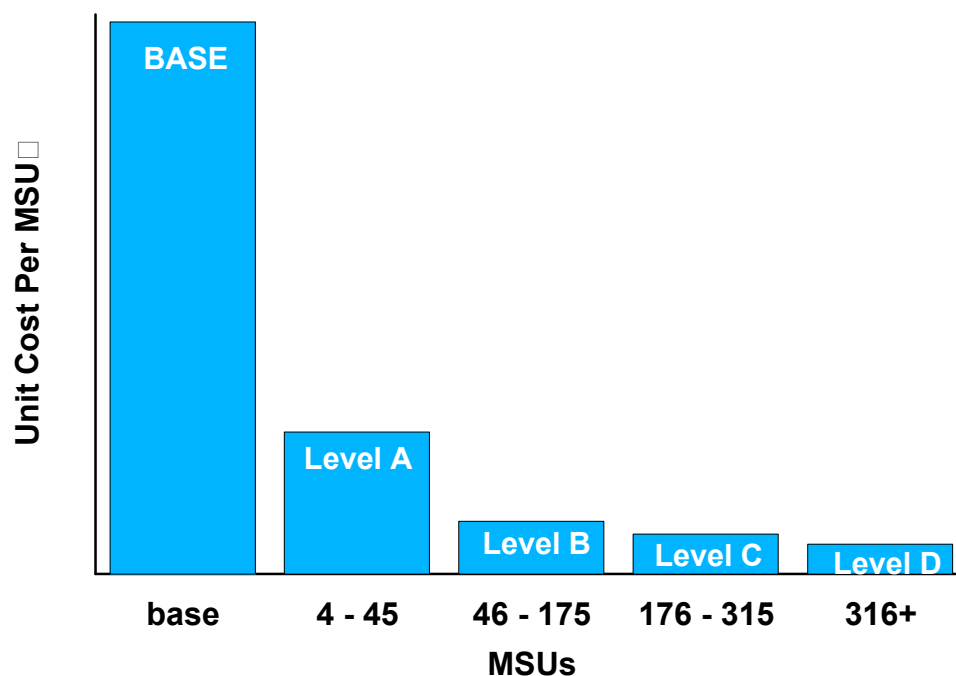

# Machine Capacity Based Metrics

# PSLC (Parallel Sysplex License Charge)

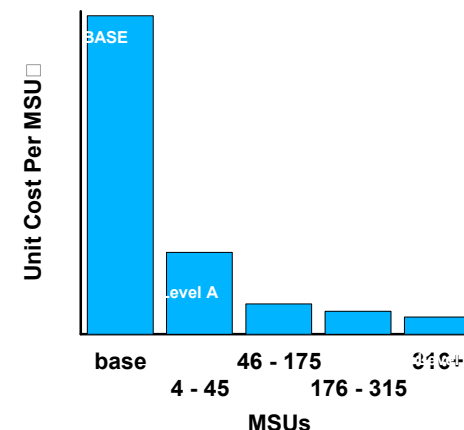

Characteristics	PSLC
Metric Type	Cumulative Tier
Aggregation	Sysplex

- Charges Based on Total Machine Capacity as expressed in MSUs
- \$/MSU Decreases as Capacity Increases
- PSLC may be applied to:
  - a single system
  - a qualified Parallel Sysplex environment with aggregation of MSUs across the sysplex

## Example: PSLC Pricing - The Math

DB2 UDB v7 PSLC Pricing Tiers	Base	\$\$\$ per MSU
Base Price (Incl: 3 MSU)	3960	
Cumulative Unit Price for 4 to 45 MSU		208
Cumulative Unit Price for 46 to 175 MSU		88
Cumulative Unit Price for 176 to 315 MSU		66
Cumulative Unit Price for 316 + MSU		50

DB2 UDB v7 @ 284MSUs	Range	# MSUs	\$\$\$ per MSU	\$\$\$	MSUs Remaining
Base	1 - 3	up to 3	n/a	3,960	281
Level A	4 - 45	42	208	8,736	239
Level B	46 - 175	130	88	11,440	109
Level C	176 - 284	109	66	7,194	0
Total				\$ 31,330	

# Example: PSLC

Product	Box 1 MSUs	Box 2 MSUs	PSLC (aggregate)
COBOL 5648A25	44 MSUs		\$2,509 44 MSUs
Fortran 5668805	44 MSUs		517 44 MSUs
REXX 5695013	44 MSUs		1,450 44 MSUs

# ULC (Usage License Charge)

Characteristics	ULC
Metric Type	Cumulative Tier
Aggregation	Sysplex

- Alternative for PSLC (& GOLC) customers
- Eligible Products: DB2, CICS, MQ, IMS
- Measures the CPU usage of the subsystem (DB2, CICS, IMS, MQ)
- Sets one price per year for the subsystem based on previous 12 mos measurement
- Financially advantageous if subsystem uses < 25% of environment (CEC/Plex)

## DB2 Utilization Measurement

## Example: PSLC + ULC

Product	PSLC (aggregate)	PSLC w Usage
COBOL 5648A25	\$2,509 44 MSUs	\$2,509 44 MSUs

# SubCapacity Metrics

# What is "Sub-Capacity?"

sub- (prefix)

...

Subdivision: *subregion*.

**Less than completely** or normally; nearly;

zSeries @ 100 MSUs

## Full-Capacity Pricing Metrics:

Based on total rated capacity of the MACHINE where a product executes.

Ex: PSLC, FullCap WLC, zELC

## Sub-Capacity Pricing Metrics:

Based on the utilization of the LPAR(s) where a product executes.

Ex: Variable WLC, EWLC

# SubCapacity Eligible Products (as of 8/22/05)

Product ID	Product Name
5694A01	z/OS V1
5655G52	z/OS.e V1
5655018	CICS/ESA V4
5655147	CICS TS for OS/390
5697E93	CICS TS for z/OS V2
5655M15	CICS TS for z/OS V3
5695DB2	DB2 for MVS/ESA V4

# SubCapacity (Workload License Charge) Pricing Basics

## ■ SubCapacity Prerequisites

- ▶ IBM @server™ zSeries® server, or equivalent
- ▶ z/OS operating system in 64-bit mode
- ▶ Meet all specified IBM terms

## ■ SW Products divided into 2 categories

### ▶ SubCapacity Eligible Products

- Priced using SubCapacity Metric: VWLC (Variable WLC)
- Examples: z/OS, CICS, DB2, IMS, MQSeries, etc.
- Sysplex Aggregation Permitted
- Can choose to implement at Full Capacity
  - z/OS LPARs can co-exist with OS/390 LPARs
  - No reports required
- To receive benefits of SubCapacity
  - Must be fully migrated to z/OS (no OS/390 LPARs)
  - Must send in SCRT Reports every month

### ▶ Non-SubCapacity Eligible Products

- Priced using SubCap Companion Metric: FWLC (Flat WLC)
- Examples: MVS Utilities, Older Compilers, VM/VSE Middleware
- No aggregation
- The same under both SubCap and FullCap implementations

Characteristics	V WLC
Metric Type	<b>Cumulative</b>
Aggregation	<b>Sysplex</b>

Characteristics	F WLC
Metric Type	<b>Single Price</b>
Aggregation	<b>None</b>

## Variable WLC Structure

PSLC  
Lvl D

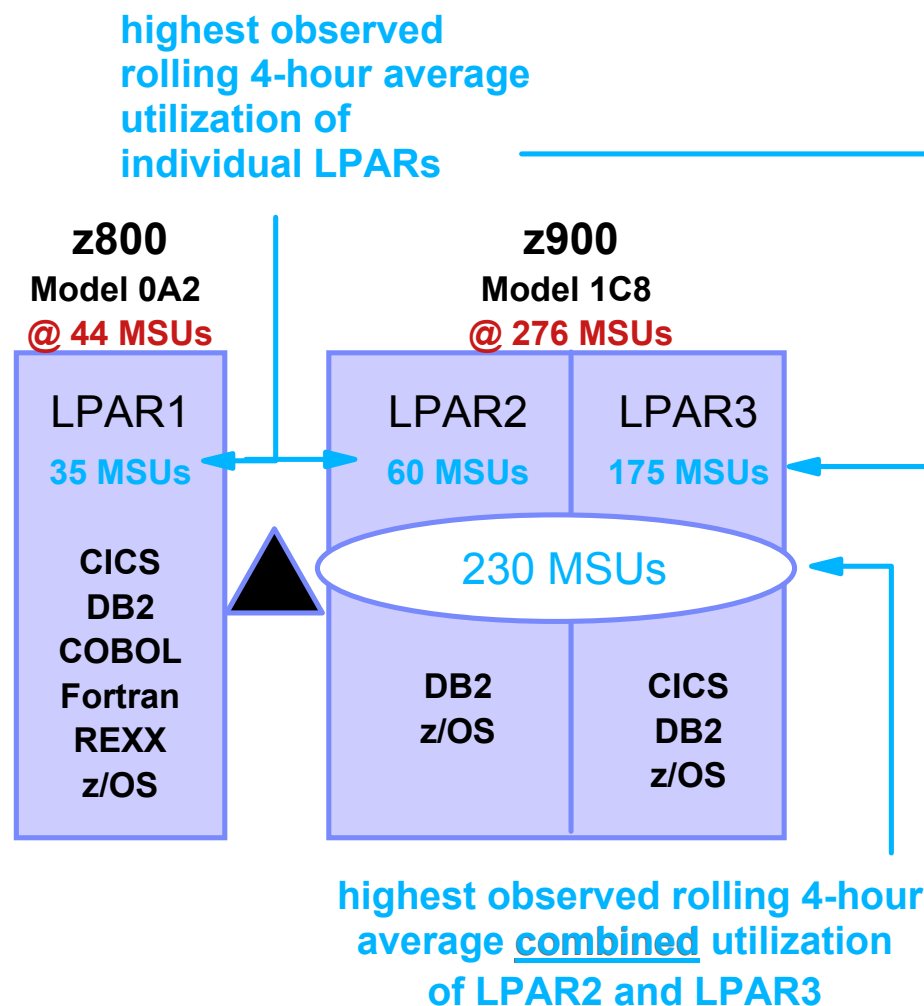

Level	Range
Base	0 - 3 MSUs
Level 0	4 - 45 MSUs
Level 1	46 - 175 MSUs
Level 2	176 - 315 MSUs
Level 3	316 - 575 MSUs
Level 4	576 - 875 MSUs
Level 5	876 - 1315 MSUs
Level 6	1316 - 1975 MSUs
Level 7	1976+ MSUs

# WLC (VWLC/FWLC) Pricing Example

Product	WLC Sub-Cap	WLC Full-Cap	PSLC

Prices in US\$ as of 7May04

# SALC (Select Application License Charge)

Characteristics	SALC
Metric Type	Cumulative Tier
Aggregation	Sysplex

- Applies to MQSeries only
- Benefits ONLY when product usage is low compared to standard billable MSUs
- Charges Based on product CPU 'consumption' as measured in MSUs
  - ▶ Reported on an Annual basis via "Usage Report"
  - ▶ Report created by IBM supplied IFAURP "Usage Reporting Program"
- \$/MSU Decreases as Capacity Increases
- Sysplex Aggregation applies
- To Price: Price each MSU based on "Tier" and add the "Tier" prices together

## Utilization Measurement

# Terms & Conditions Define Metric Combinations

	Apr04	Entry WLC + Tiered	Sep03	Entry WLC + zELC	Sep01	WLC VWLC + FWLC	Apr02
Eligible Machines		z890 Only (not mdl 110)		z800 z890-110		z900, z990, z9109 z800**, z890** **Sysplex Only

Aggregation		None		None		Sysplex	
Planning Tool		SubCapacity Planning Tool		SubCapacity Planning Tool		SubCapacity Planning Tool	
Implementation Tool		SubCapacity Reporting Tool		SubCapacity Reporting Tool		SubCapacity Reporting Tool	

# Benefits of SubCapacity

## ■ Disconnect Hardware Growth from Software Charges for SubCap products

- ▶ Allows you to grow hardware capacity independently of software capacity  
e.g., Upgrade server and pay for software based on the utilized portion of the server
- ▶ Grow into excess HW capacity gradually as needed with a 1 MSU level of granularity
- ▶ Spike into "spare" capacity without incurring software charges
- ▶ Manage utilization without having to turn engines on and off

## ■ Grow an LPAR without affecting software in other LPARs

- ▶ Isolate products in certain LPARs to reduce software costs (OPTIONAL)
- ▶ Reduce LPAR Utilization to reduce software costs (OPTIONAL)
- ▶ Add capacity to grow your CICS LPAR without impacting your IMS LPAR

## ■ Align Software Charges with Utilization

- ▶ Pay based on highest rolling 4-hour average utilization each month, not peak utilization
- ▶ Sub-Capacity Reporting Tool manages measurement/reporting
- ▶ Software charges increase/decrease based on variations in utilization

NOTE: Remember, this is NOT sub-system utilization... it is LPAR utilization

## ■ For ELA/ESSO:

- ▶ Actual monthly software inventory value is compared against the MLC cap

# Specialty Pricing Metrics

# NALC (New Application License Charge) Ts & Cs

The New Application Growth Environment offers an attractive new software price to customers dedicating a standalone zSeries, S/390 or equivalent processor to qualifying new applications and/or to the consolidation of UNIX or NT print and/or file server workloads. This new software price, called the New Application License Charge, is available on OS/390 V2 (5647-A01), z/OS V1 (5694-A01), Lotus Domino for OS/390 V5R5 (5655-B86) and selected optional features of these products.

## Eligibility:

To be eligible for New Application License Charges, you must have a zSeries, a S/390, or equivalent machine installed and dedicated to server consolidation of Unix or NT platform print or file server workloads or to one or more of the following qualifying applications (called "Qualifying Application(s)"):

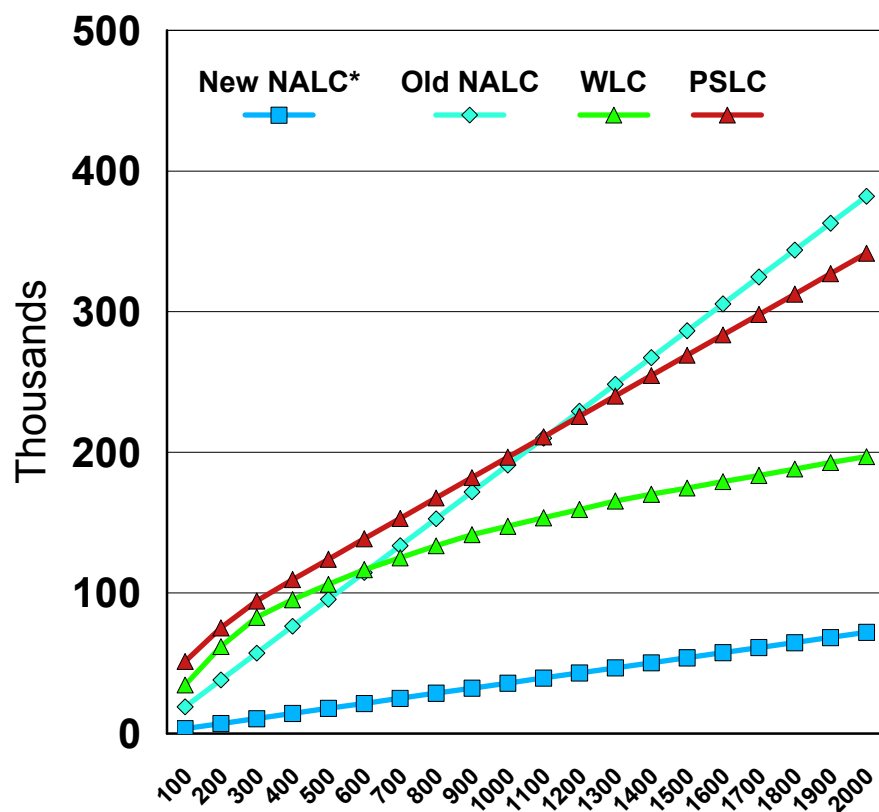

1. Lotus Domino
2. Net.Commerce
3. Payment Server
4. Payment Gateway
5. WebSphere Payment Manager
6. Intelligent Miner for OS/390
7. SAP
8. PeopleSoft
9. Baan ERP
10. Oracle Applications for OS/390
11. DB2 OLAP Server for OS/390
12. WebSphere Application Server for OS/390 or z/OS
13. Siebel
14. WebSphere Commerce
15. Lawson ERP Applications
16. Walker e-Business Applications
17. Intelligent Miner for Data for OS/390

NOTE: Programs running on z800 (IBM 2066) or Multiprise 3000 (IBM 7060) Machines or their equivalents are not eligible for New Application License Charges.

This new software price makes it attractive for customers to implement new applications, or consolidate, non-S/390, UNIX or NT print and/or file server workloads by providing a S/390 value-priced alternative to UNIX platforms allowing customers to grow the industry's hottest application set in a dedicated S/390 environment.

# z/OS NALC (z/OS.e) Price Curve Comparison

## NALC (z/OS.e) Price Curve Comparison

## Savings with NALC (z/OS.e)

z/OS	VS PSLC	VS WLC
100 msu	93%	90%
500 msu	85%	83%
1000 msu	82%	76%
1500 msu	80%	69%
2000 msu	70%	63%

SW Prices in US\$

They are presented here for illustrative purposes only.

# NALC: Sysplex Aggregation + WLC Pricing

- Available in both PSLC and WLC environments
- NALC standard offering requires a dedicated machine (can participate in a Sysplex)
- NALC machine may have PSLC/WLC Sysplex Aggregation for middleware if PSLC/WLC terms are met
- SubCapacity WLC may apply in a WLC Based Sysplex

## WLC SubCapacity Example

MTM	System Name	Type	MSU	85%	WLC
2064-1C7	System01 (New Appl)	z900	247	210	No
2064-111	System02 (Trad'l)	z900	350	298	No

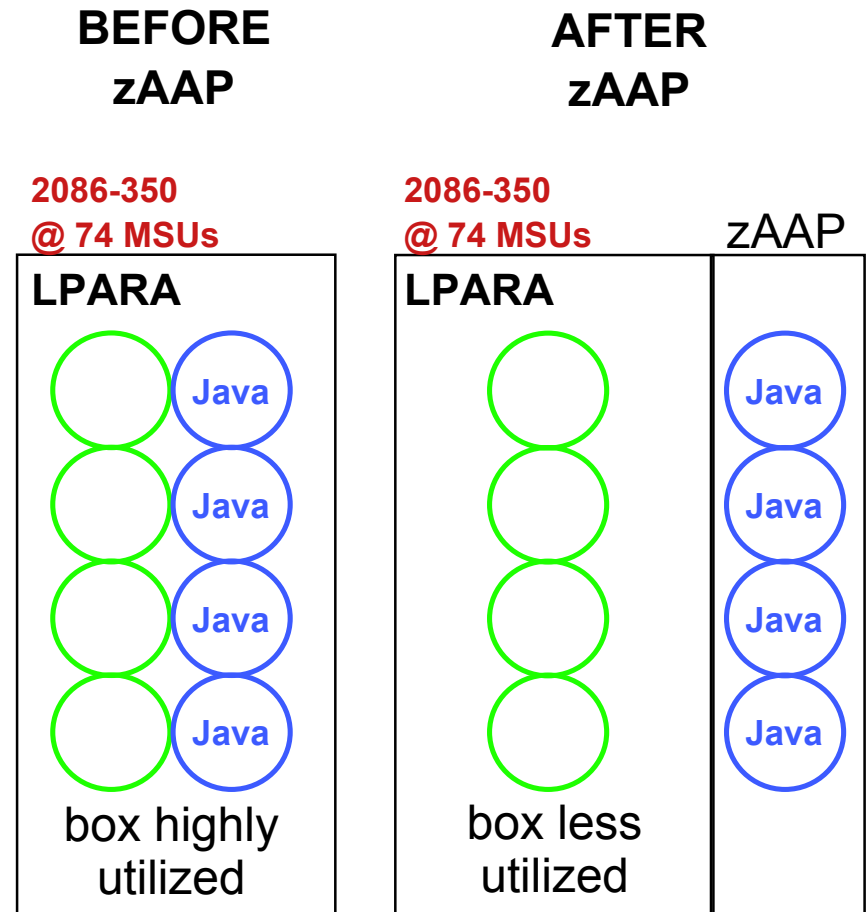

- Assume 15% white space for SubCap WLC  
 $1C7 @ 247 \text{ MSUs (15\% white space)} = 247 \cdot .85 = 210 \text{ MSUs}$   
 $111 @ 350 \text{ MSUs (15\% white space)} = 350 \cdot .85 = 298 \text{ MSUs}$
- NALC SW must be priced at full-machine capacity

PID	Software Name	Type	WLC Qty	MSU	Price	Total
5645DB2	DB2 UDB for OS/390		508		41868	41868
	01	VWLC		210		
	02	VWLC		298		
5655B86	Domino for OS/390		n/a		7657	7657
	01	NALC		247		
5655F10	MQSeries for OS/390		508		23922	23922
	01	VWLC		210		
	02	VWLC		298		
5655147	CICS TS for OS/390		298		35052	35052
	02	VWLC		298		
5694A01	z/OS v1 Base		298		91215	91215
	01	NALC		210	8892	
	02	VWLC		298	82323	
				Total	Monthly	199714

# zAAP (zSeries Application Assist Processor)

- zAAP – New processor type dedicated exclusively for Java workloads under z/OS – e.g. WebSphere
  - ▶ z/OS 1.6 required (available 9/04)
  - ▶ Java SDK 1.4.1 required
- Enabled by zSeries innovative PR/SM virtualization
  - ▶ CPs and zAAPs in the same z/OS LPAR
  - ▶ Java work ONLY directed to zAAPs by z/OS 1.6+
- Can lower cost of computing for Java technology-based application servers
  - ▶ Attractively priced at \$125K USD per zAAP.
  - ▶ z990 and z890
  - ▶ No IBM software charges on zAAPs
  - ▶ zAAP HW feature available June 30, 2004; enabled with z/OS 1.6 (9/04)

## zAAP w/ FullCap EWLC

**BEFORE**

2086-350

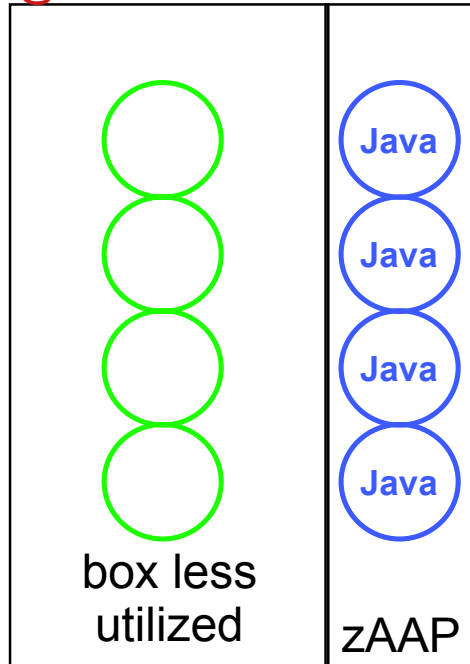

@ 74 MSUs

**AFTER**

2086-350

@ 74 MSUs

- ✓ Full-Capacity EWLC
- ✓ adds zAAP instead of upgrading to 360 or 450
- ✓ Java workload runs on zAAP engine
- ✓ Full-Capacity EWLC charges remain at 74 MSUs

## zAAP w/SubCap EWLC

**BEFORE**

2086-350

@ 74 MSUs

LPARA  
R4HrAvg: 64 MSUs

**AFTER**

2086-350

@ 74 MSUs

LPARA  
R4HrAvg: 42 MSUs

- ✓ Sub-Capacity EWLC
- ✓ adds zAAP instead of upgrading to 360 or 450
- ✓ Java workload runs on zAAP engine
- ✓ LPARA's rolling 4-hour avg decreases from 64 to 42 MSUs (only utilization of general purpose CPs is measured)
- ✓ Sub-Cap Products in LPARA = 42 MSUs

**Similar SW pricing concepts apply to z990 + zAAP**

# Monthly License Charges Machine Summary

	Metric Type	Aggr	z9109 (2094)	z990 (2084)	z900 (2064)	z890 (2086)	z800 (2066)	MP3K (7060)	Other
<b>PSLC: Parallel Sysplex License Charge</b> - allows ULC - allows NALC	Cumulative Tiered	Y	x	x	x	x (plex)	x (plex)		x
<b>(V)WLC: Variable Workload License Charge</b> - allows SALC - allows NALC	Cumulative Tiered	Y	x	x	x	x (plex)	x (plex)		
<b>(F)WLC: Flat WLC - with VWLC</b>	Single Price	N	x	x	x	x (plex)	x (plex)		
<b>EWLC: Entry Workload License Charge</b> - allows SALC - allows z/OS.e (eWLC)	Cumulative Tiered	N				x	x		
<b>TWLC: Tiered EWLC - with EWLC</b>	Simple Tiered	N				x	x		
<b>zELC: zSeries Entry License Charge</b> - allows z/OS.e (engine)	Model Based	N				x (110 Only)	x		
<b>GOLC: Growth Opportunity License Charge</b> - allows ULC	Model Based	N						x	

ULC = Usage License Charges = available only for MQSeries, DB2, CICS, IMS; used when product has low utilization

SALC = Special Application License Charges = available ONLY for MQ Series; used when product has low utilization

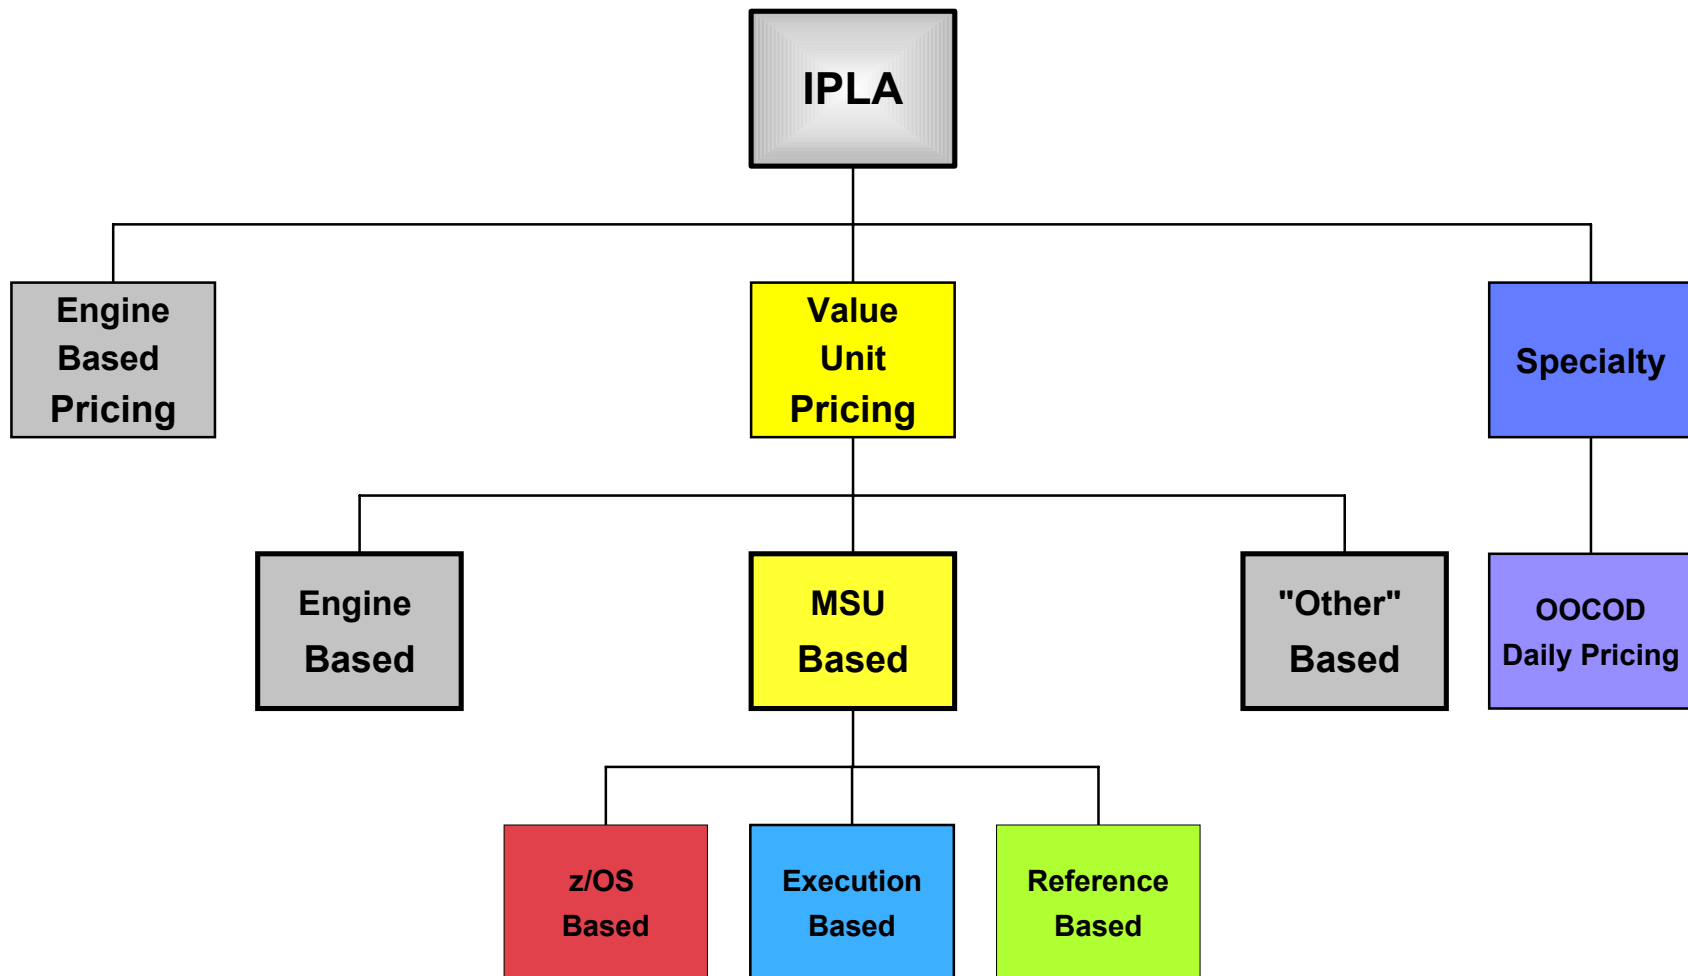

NALC = New Application License Charges = available only for z/OS, OS/390, Domino V5; associated w/ ebusiness

z/OS.e = low cost / reduced function version of z/OS for ebusiness; CICS and IMS cannot run on z/OS.e

# One Time Charge Software IPLA

# IPLA Pricing Structures

# zSeries IPLA Terminology

<b>IPLA</b>	International Program License Agreement The contract that governs IBM "one time charge" software (zSeries & PPA)
<b>Value Unit</b>	Pricing Unit: IPLA prices are stated as a \$/VU
<b>Value Unit Basis</b>	The measurable entity that is used to determine the amount (in Value Units) of Required License Capacity (e.g., MSUs, engines, concurrent users, etc)
<b>Required License Capacity</b>	The # of Value Units a Customer must license to meet the IBM Ts & Cs
<b>Entitled License Capacity</b>	The # of Value Units of zSeries IPLA license the Customer has acquired
<b>Environment</b>	A single/standalone machine OR A qualified Parallel Sysplex. Customers may have multiple environments.
<b>Parent</b>	A zSeries MLC program (e.g., DB2, CICS, IMS) that is supported by a zSeries IPLA program with Reference Based terms

## zSeries IPLA Characteristics

- IBM IPLA Contracts online at **ibm.com/software/sla**
  - ▶ Generic "base" IPLA Contract & product-specific "License Information" contracts available
  - ▶ **IPLA Amendment for zSeries Platform Programs Sub-Capacity Pricing (Z125-6929).**
- IPLA Programs have a One-Time-Charge for License Acquisition
  - ▶ New and/or existing entitlements may be used in a Full-Capacity or a Sub-Capacity environment
  - ▶ Aggregate across entire Enterprise
- (Optional) Recurring Annual Charge for Subscription & Support (S&S)
  - ▶ S&S provides version-to-version upgrades at no charge
  - ▶ S&S provides break/fix support
  - ▶ S&S is optional, but strongly encouraged
  - ▶ S&S is an annual charge called "Annual License Charge"
  - ▶ If purchased, S&S capacity MUST equal license capacity
  - ▶ S&S automatically renews each year
  - ▶ Existing S&S cannot be cancelled except at renewal date
- For each zSeries IPLA Product...
  - ▶ there is a unique product ID per version
  - ▶ there is a common S&S product ID across all versions

Product ID	Product
5697-F19	Fault Analyzer V1
5655-G74	Fault Analyzer V2
5655-J47	Fault Analyzer V3
5655-L25	Fault Analyzer V4
5697-G59	Fault Analyzer S&S

# Value Unit Overview

- Value Unit Pricing Converts various other measurements to Value Units
  - The most common conversion is MSUs to Value Units**
    - It is also possible to convert engines, messages and other measurements to Value Units
  - For each Value Unit Priced program, there is a single price per Value Unit
  - For each Value Unit Priced program, there is a specific 'Value Unit Exhibit' (VUEXXX)
  - The 'Value Unit Exhibit' establishes the appropriate Value Unit conversion

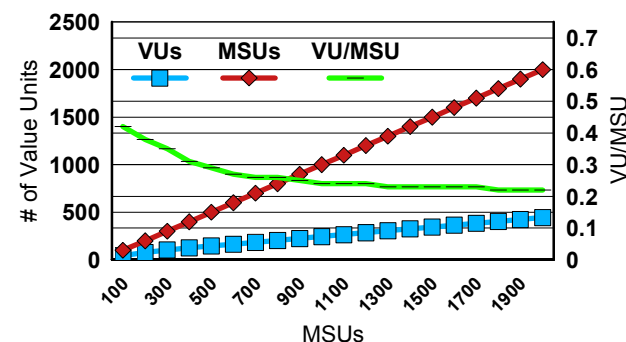

## Value Unit Exhibit 007 (VUE007):

MSUs 1 - 3, need 1 VU per MSU  
 MSUs 4 - 45, need .45 VUs per MSU  
 MSUs 46 - 175, need .36 VUs per MSU  
 MSUs 176 - 315, need .27 VUs per MSU  
 MSUs 316+, need .20 VUs per MSU

## Value Unit Exhibit 001 (VUE001):

MSUs 1 - 3, need 5.25 VUs per MSU  
 MSUs 4 - 45, need .83 VUs per MSU  
 MSUs 46 - 175, need .35 VUs per MSU  
 MSUs 176 - 315, need .26 VUs per MSU  
 MSUs 316+, need .20 VUs per MSU

## Value Unit Curve

Product ID	Product	Price per VU
5697-F19	Fault Analyzer V1	\$2,325/VU
5655-G74	Fault Analyzer V2	\$2,325/VU
5655-J47	Fault Analyzer V3	\$2,325/VU
5655-L25	Fault Analyzer V4	\$2,325/VU
5697-G59	Fault Analyzer S&S	\$349/VU

## Value Unit Exhibit 007 (VUE007)

## Fault Analyzer (VUE007) Examples:

*Fault Analyzer 100 MSUs => 42 VUs =>  
 \$98K (\$980/MSU)*

*Fault Analyzer 2000 MSUs => 444 VUs =>  
 \$1.03M (\$515/MSU)*

**Value Unit Converter Tool from [ibm.com/zseries/swprice](http://ibm.com/zseries/swprice)  
 will convert MSUs to Value Units**

# IPLA Value Unit Enterprise Aggregation

- Applies to **all** IPLA Metrics
- Combines Value Unit Basis (e.g., MSUs) for all machines in **ENTERPRISE** before calculating # of VUs needed
- Calculation of additional capacity uses Current Entitlement as starting point

## Denver

2066-003  
84 MSUs

Fault  
Analyzer  
(5655-L26)

### Customer One:

Deploying Fault Analyzer on 2066-003

Use VUConverter to Convert total MSUs (84) to Value Units (36)

Total for 36 VUs @ \$36/VU = \$83,700 lic (\$12,564 S&S)

## New York

2066-003

Analyzer  
(5655-L26)

### Customer Two:

Deploying Fault Analyzer on 2066-003, 2064-116

Use VUConverter to Convert total MSUs (525) to Value Units (149)

Total for 149 VUs @ \$36/VU = \$346,425 lic (\$52,001 S&S)

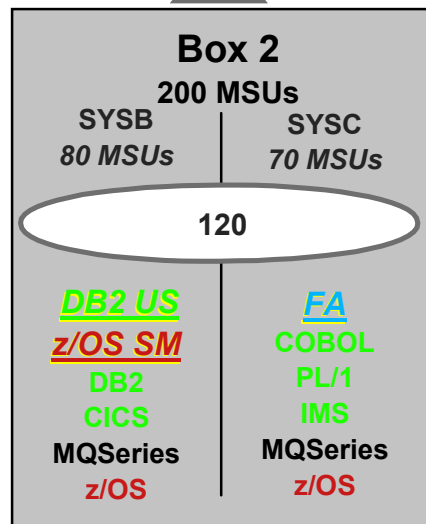

# Summary of MSU Based Value Unit Ts & Cs

**Most zSeries IPLA Programs with MSU based Value Unit Pricing  
will fall into one of the following categories...**

	z/OS Based	Execution Based	Reference Based
<u>Full Capacity</u>  For machines w/ PSLC, zELC or FullCap EWLC/WLC	Required license capacity equals the capacity of the <b>machine(s)</b> where the IPLA program <b>executes</b>	Required license capacity equals the capacity of the <b>machine(s)</b> where the IPLA program <b>executes</b>	Required license capacity equals the capacity of the <b>parent program</b> across the <b>environment</b>
<u>Sub Capacity</u>  For machines w/ SubCap EWLC/WLC	Required license capacity equals the <b>z/OS capacity</b> of the <b>machine(s)</b> where the IPLA program <b>executes</b>	Required license capacity equals the capacity of the <b>LPAR(s)</b> where the IPLA program <b>executes</b>	Required license capacity equals the capacity of the <b>parent program</b> across the <b>environment</b>

**For products which are "unclassified",  
the product announcement materials will outline the applicable Ts & Cs.**

## CHECKLIST

- Desired Programs
- Terms for each Program
  - ▶ z/OS-based
  - ▶ execution-based
  - ▶ reference-based
- Deployment Plan
  - ▶ Full-Cap or Sub-Cap
  - ▶ Standalone or Sysplex
  - ▶ For execution-based, which LPARs?
  - ▶ For z/OS-based, which boxes?
- Required License Capacity
  - ▶ Combine checklist data to determine required license capacity

## Desired Programs

1. Fault Analyzer, execution-based terms
2. DB2 Utilities Suite, reference-based terms
3. z/OS Session Manager, z/OS-based terms

IPLA Product	FullCap	SubCap
Fault Analyzer	Box 2 200 msu	SYSC 70 msu
DB2 Util Suite	Box 1, 2 300 msu	SYS A, B 170 msu
z/OS SMgr	Box 1, 2 300 msu	SYS A,B,C 210 msu
