

IBM Linux on System z Executive Advisory Customer Council

Friday December 7th , 2012 8:30 AM – 1:00 PM

Hosted at Insurance Services Office

545 Washington BLVD

Jersey City, NJ 07310

You're invited to join us for the next session of the Linux on System z Executive Advisory Council. We launched this council in 2002 in order to garner your insights and foster communications among the System z Linux community. We are grateful to accept ISO's gracious invitation to host this council session at their auditorium, particularly given our tremendous gains in attendance and popularity.

The council welcomes Mike Baskey to the session. Mike is IBM's chief architect for IBM Service management strategy for System z. Mike will be discussing IBM's Smart Cloud Strategy. Our customer speaker will be Brain Callaghan from Nationwide. Brain will be presenting Nationwide's perspective on cloud and describing how Nationwide has created a cloud on System z. We are also pleased to announce another unplugged panel discussion. The topic will be the financial business justification for Linux on System Z. To lead the discussion we have Monte Bauman. Monte is one of the founders of the RACE tool which IBM uses to help clients understand total cost of ownership. The panel members will be ADP, Citi, Nationwide and ISO. The council also welcomes Filipe Miranda from Red Hat. Filipe is the worldwide System z Lead. Filipe will be providing a Red Hat update.

Agenda
