

RSU INFORMATION FOR IBM® Z/VM® VERSION 7 RELEASE 1.0 INSTALL PACKAGE

Only the RSU received with your z/VM product order (on DVD or delivered electronically) may be used in conjunction with your installation of z/VM. The physical DVD will be marked "For use with z/VM Installation only" or for electronic delivery. The RSU must be installed during the z/VM installation process.

RSU CONTENTS

Along with the z/VM installation package, and the set of products shipped with z/VM V7.1, there is an RSU provided. This RSU contains the IBM® recommended service that will be installed when you install z/VM.

Service may be included for the products/components listed below.

7VMSES10	z/VM	7.1.0	-	VMSES
7VMREX10	z/VM	7.1.0	-	REXX
7VMCMS10	z/VM	7.1.0	-	CMS
7VMCPR10	z/VM	7.1.0	-	CP
7VMDVF10	z/VM	7.1.0	-	DV
7VMGCS10	z/VM	7.1.0	-	GCS
7VMTSA10	z/VM	7.1.0	-	TSAF
7VMAVS10	z/VM	7.1.0	-	AVS
6VMLEN20	z/VM	6.2.0	-	LE
7VMTCP10	Level	7.1.0	-	TCPIP
7VMPTK10	FL	710	-	PERFTK
7CMHCD10	FL	710	-	VMHCD
7VMDIR10	FL	710	-	DIRM
7VMRSC10	FL	710	-	RSCS
7VMRAC10	FL	710	-	RACF®
5684042J	Level	17.0.0	-	ICKDSF

RSU PACKAGE LEVEL IDENTIFIER

In addition to the individual product RSU service levels, the z/VM RSU also has a package level identifier. The format of the RSU package level identifier is:

VRNNRSU - where V is the Version number, R is the release number and NN is the sequential number of the RSU for that version and release.
Example: 7101RSU, 7102RSU, etc.

The package level will be reflected on the external physical DVD label or as part of the file name of an electronically delivered file. The service level of each individual product is reflected separately. The service level of all products and features serviced by RSU will continue to be in the format of YYNN level.

Once you have installed z/VM and the installation RSU, you may use one of the following commands to see information about the service levels that were installed by the installation RSU.

- The command "VMFUPDAT SYSSUF" will display a table of all the components on your system and their current RSU or ESO service and production levels.
- The command "SERVICE ALL STATUS" will display the current RSU or ESO service and production levels on your console.

For information on the RSU package level and the included individual product service levels, refer to VM RSU internet web site at:

www.vm.ibm.com/service/rsu/stk710.html

PTF FOR ORDERING FUTURE RSUS

You may obtain the most current level of the RSU by ordering the RSU PTF, PTF number UM97710. Refer to Section 3, "Program Support", and Section 4, "Program and Service Level Information", in the *Program Directory for z/VM, version 7 release 1* (GI13-4358), for additional information on ordering and installing service for z/VM.

VM HOME PAGE ON THE INTERNET

The z/VM web site will keep you up to date on the latest news, activities and information pertaining to the

VM Operating system. Please visit the z/VM web site at: www.vm.ibm.com
