IPLA Pricing Structures

zSeries IPLA Terminology

IPLA	International Program License Agreement The contract that governs IBM "one time charge" software (zSeries & PPA)
Value Unit	Pricing Unit: IPLA prices are stated as a \$/VU
Value Unit Basis	The measurable entity that is used to determine the amount (in Value Units) of Required License Capacity (e.g., MSUs, engines, concurrent users, etc)
Required License Capacity	The # of Value Units a Customer must license to meet the IBM Ts & Cs
Entitled License Capacity	The # of Value Units of zSeries IPLA license the Customer has acquired
Environment	A single/standalone machine OR A qualified Parallel Sysplex. Customers may have multiple environments.
Parent	A zSeries MLC program (e.g., DB2, CICS, IMS) that is supported by a zSeries IPLA program with Reference Based terms

zSeries IPLA Characteristics

 - ▶ New and/or existing entitlements may be used in a Full-Capacity or a Sub-Capacity environment
 - ▶ Aggregate across entire Enterprise
- (Optional) Recurring Annual Charge for Subscription & Support (S&S)
 - ▶ S&S provides version-to-version upgrades at no charge
 - ▶ S&S provides break/fix support
 - ▶ S&S is optional, but strongly encouraged
 - ▶ S&S is an annual charge called "Annual License Charge"

Value Unit Overview

- Value Unit Pricing Converts various other measurements to Value Units
 - The most common conversion is MSUs to Value Units**
 - It is also possible to convert engines, messages and other measurements to Value Units
 - For each Value Unit Priced program, there is a single price per Value Unit
 - For each Value Unit Priced program, there is a specific 'Value Unit Exhibit' (VUEXXX)
 - The 'Value Unit Exhibit' establishes the appropriate Value Unit conversion

Value Unit Exhibit 007 (VUE007):

MSUs 1 - 3, need 1 VU per MSU
 MSUs 4 - 45, need .45 VUs per MSU
 MSUs 46 - 175, need .36 VUs per MSU
 MSUs 176 - 315, need .27 VUs per MSU
 MSUs 316+, need .20 VUs per MSU

Value Unit Exhibit 001 (VUE001):

MSUs 1 - 3, need 5.25 VUs per MSU
 MSUs 4 - 45, need .83 VUs per MSU
 MSUs 46 - 175, need .35 VUs per MSU
 MSUs 176 - 315, need .26 VUs per MSU
 MSUs 316+, need .20 VUs per MSU

zSeries IPLA Characteristics

- IBM IPLA Contracts online at **ibm.com/software/sla**
 - ▶ Generic "base" IPLA Contract & product-specific "License Information" contracts available
 - ▶ **IPLA Amendment for zSeries Platform Programs Sub-Capacity Pricing (Z125-6929).**
- IPLA Programs have a One-Time-Charge for License Acquisition
 - ▶ New and/or existing entitlements may be used in a Full-Capacity or a Sub-Capacity environment
 - ▶ Aggregate across entire Enterprise
- (Optional) Recurring Charge for Subscription & Support (S&S)
 - ▶ S&S provides version-to-version upgrades at no charge
 - ▶ S&S provides break/fix support
 - ▶ S&S is optional, but strongly encouraged
 - ▶ S&S is an annual charge called "Annual License Charge"
 - ▶ If purchased, S&S capacity MUST equal license capacity
 - ▶ S&S automatically renews each year
 - ▶ Existing S&S cannot be cancelled except at renewal date
- For each zSeries IPLA Product...
 - ▶ there is a unique product ID per version
 - ▶ there is a common S&S product ID across all versions

Product ID	Product
5697-F19	Fault Analyzer V1
5655-G74	Fault Analyzer V2
5655-J47	Fault Analyzer V3
5655-L25	Fault Analyzer V4
5697-G59	Fault Analyzer S&S

IPLA Value Unit Enterprise Aggregation

- Applies to **all** IPLA Metrics
- Combines Value Unit Basis (e.g., MSUs) for all machines in **ENTERPRISE** before calculating # of VUs needed
- Calculation of additional capacity uses Current Entitlement as starting point

Summary of MSU Based Value Unit Ts & Cs

Most zSeries IPLA Programs with MSU based Value Unit Pricing will fall into one of the following categories...

	z/OS Based	Execution Based	Reference Based
<u>Full Capacity</u> For machines w/ PSLC, zELC or FullCap EWLC/WLC	Required license capacity equals the capacity of the machine(s) where the IPLA program executes	Required license capacity equals the capacity of the machine(s) where the IPLA program executes	Required license capacity equals the capacity of the parent program across the environment
<u>Sub Capacity</u> For machines w/ SubCap EWLC/WLC	Required license capacity equals the z/OS capacity of the machine(s) where the IPLA program executes	Required license capacity equals the capacity of the LPAR(s) where the IPLA program executes	Required license capacity equals the capacity of the parent program across the environment

**For products which are "unclassified",
the product announcement materials will outline the applicable Ts & Cs.**
